

SHIKHAR SHUKLA

Full Stack Developer & Behavioral Product Researcher

shikharshukla678@gmail.com · Vadodara, Gujarat · +91 9825496937 · [Substack](#) · [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building production applications for international clients across Canada, UK, USA, and the Netherlands. Skilled in React.js, Next.js, and Laravel — from architecture to deployment. Additionally researches and writes about behavioral product psychology, analyzing how digital products influence human thinking and decision-making.

TECHNICAL SKILLS

Frontend:	React.js · Next.js · TypeScript · Tailwind CSS · shadcn/ui · Redux
Backend:	NestJS · Laravel · Node.js · Express.js
Database:	MySQL · MongoDB
Tools:	Git · GitHub · Docker · AWS S3 · REST APIs · Swagger · Vercel · Coolify
Research:	Behavioral Product Psychology · UX Analysis · Persuasive Design · Dark Patterns

WORK EXPERIENCE

Software Development Engineer I · DevLoops Technologies Pvt Ltd Jan 2026 – Present

- ▶ **Booksly** · VAT Reconciliation Platform | United Kingdom
 - Sole full stack developer — owned backend architecture, frontend integration, and cloud infrastructure end to end.
 - Built complete VAT reconciliation and financial data collection platform for a UK accounting client using Next.js (SSR), NestJS, and MongoDB.
 - Architected all endpoint modules — auth, users, companies, accountants, tasks, notifications, and email — tested via Swagger.
 - Convinced client to migrate from a physical server in Vadodara to AWS S3 for high availability and data redundancy, eliminating repeated downtime.
 - Deployed on Vercel with SSR for fast initial load and always-current financial data.
- ▶ **Appear Appraisals** · Real Estate Platform | Ontario, Canada
 - Designed and built a 5-role access system — Super Admin, Admin, Appraiser, Review Officer, Submission Officer, and Client — each with its own permissions and data view.
 - Engineered the complete data workflow showing how an appraisal request moves from client submission through appraiser, review, and final report delivery.
 - Built a detailed property appraisal form with 900+ fields, fully compliant with Canadian appraisal industry standards.
 - Optimised page load speed and responsiveness across all devices. <https://appraisalat.devloops.io/>
- ▶ **OPD.CARE** · Healthcare Platform | India
 - Debugged a critical production issue that was overloading the server and taking the application offline; restored full stability for live clinic users.
 - Built a 4-role access system — Super Admin, Admin, Doctor, and Receptionist — where a single user can hold multiple roles within the same clinic.
 - Integrated online payment processing, email notifications, QR code appointment booking, SMS notifications, and interactive clinic map.
 - Live platform serving active clinics. <https://opd.care/>

Training Engineer · DevLoops Technologies Pvt LtdJul 2025 – Dec 2025

▶ **DevLoops Official Website** · Corporate Website | devloops.io

- Built the full company website — services, portfolio, team, blog, careers, and contact pages — with a fully responsive layout inspired by Supabase.com.
- Made all content fully manageable through a custom admin panel — blog posts, job listings, and services can be updated without coding.

Software Development Intern · DevLoops Technologies Pvt LtdMar 2025 – Jun 2025

▶ **Resteel Solutions B.V.** · Industrial / Sustainable Steel Recycling | Netherlands

- Built a full content management system covering warehouses, business contacts, site settings, and site content.
- Migrated over 1,000 contacts with all their data from the old website to the new platform.
- Developed the invoicing system and business analytics dashboard with support for 3 languages — English, Dutch, and Flemish.
- Live website: <https://resteel.devloops.io/>

▶ **Shiv Trans Inc** · Logistics & Transportation Website | USA

- Built a professional logistics website for a USA-based trucking company with live route display and operational data integration.
- Live website: <https://shiv-trans-inc.vercel.app/>

BEHAVIORAL PRODUCT RESEARCH

I research and write about how digital products manipulate human behavior — analyzing persuasive design, dark patterns, and metacognitive hijacking through first-person observation.
